"We all have a desire to create something that will show we were here. This is a desire we at Porsche have always had for our cars. Not to merely create transportation, but to create designs timeless in their aesthetics and engineering. Cars that will be testaments to what could technically be accomplished at a given point in time. Cars which will be respected not only in their own day, but indefinitely, because they appeal to a basic appreciation for logical thought, precision and creativity."
